Description

Marko

- Children's rehabilitation shoes with a transverse and longitudinal arch support and functionally shaped heel area are designed to be used at home as well as at school, and at the same time they enhance lower limbs rehabilitation. They help to hold your body properly.
- The shoe flexibility is adjusted to the shoe design, the choice of the top and lining material, the sole, and the manufacturing method. The upper part of the shoe is made from natural leather with adjustable velcro fasteners.
- Sole: polyurethane
- Upper part and insole: natural leather
- Good for thumb and foot strengthening bending of toes, especially the thumb, and actively pushes the thumb out.
- Longitudinal and transverse arch prevents the creation of flat feet and fall of the arch, reduces walking shocks and eases the heel pressure.
- Heel pad reduces walking shocks and eases the heel pressure.
- Reinforced heel hinders the protrusion of the heel and ankle.
